

CLEAN & DRY

Clean & Dry is a highly absorbent desiccant powder infused with essential oils designed to help provide a dry and comfortable environment for your animals.

Pig

Absorbent Sanitising Powder for Pigs

Relying solely on disinfecting surfaces is not always sufficient in ensuring the removal of pathogenic bacteria, as excess moisture can lead to unwanted bacterial growth following clean down. Clean & Dry is a blend of natural minerals and essential oils with enhanced absorptive ability to help keeping areas Clean & Dry!

Ideal for use in farrowing house, fattening stock housing and when mixing and transporting stock.

Key Benefits

- ✓ Helps to keep environmental microbial load in check.
- ✓ When used in creep areas; helps maintain warm, dry piglets and encourages feeding activity post birth.
- ✓ Ideal for when mixing stock, to reduce stress during re-grouping.
- ✓ Essential oils have moisturising and hydrating qualities which can help prevent the skin from drying out and keep the skin supple.
- ✓ Can absorb twice its weight of moisture to help provide and maintain a dry environment.
- ✓ Applied to floors and ramps to help reduce the risk of slips and falls of both animals and humans.

How to Use

Spread evenly within the environment, reapply if necessary, and sweep excess material away during routine cleaning.

Sows

Breeding: 100 g/sow/day.

Pre-farrowing: 250 g/sow/day.

Farrowing area: 30 – 50 g/m² as required.

Piglets & Nursery Areas

Apply in pen to wet patches and to areas of scouring.

Newborn piglets: 5 g/piglet, dust lightly ensuring the umbilical cord is covered. Avoid the eye area.

Growing & Finishing Pigs

Can be lightly dusted over pigs.

Up to 300 g/pig/day.

Regrouping & Transport

A light dusting over stock and equipment.

For best results, use continuously throughout the year.

Once opened, ensure the bag is tightly sealed between use to ensure longevity of the product, and store in a cool, dry area away from heat and damp conditions.
