

## GENEX POULTRY

Genex Poultry is a unique blend of acids, essential oils and plant extracts for use in poultry diets. Specifically designed for use in poultry to help develop a balanced gut environment and maintain healthy performance.

### Poultry

#### Acid-Based Gut Health Supplement for Poultry

Specifically designed for use in poultry to help maintain a healthy and robust gut environment.

A well-balanced and diverse gut microflora has a positive impact on the metabolic and immune systems of the animal, which is beneficial to overall animal health and performance.

#### Key Benefits

- ✓ Helps a healthy animal achieve its genetic potential.
- ✓ Helps reduce wet litter.
- ✓ Promotes development of a balanced gut microflora.
- ✓ Helps keep pathogenic bacteria under control.
- ✓ The active ingredients are known to control the growth of *Campylobacter*, *Salmonella*, *E. coli*, and other gram-negative microorganisms in raw materials and finished feed.
- ✓ Essential oil and plant extract are selected for their 'triple-anti' properties: antioxidant, antibacterial and anti-inflammatory.
- ✓ Anpario's unique carrier system transforms the liquid actives into a free-flowing powder, ensuring the product's long-lasting activity.
- ✓ Can be used as part of a programme to reduce use of antimicrobials.

#### How to Use

Suitable for use in table birds, layers, turkeys, ducks and game birds.

It is advised for Genex Poultry to be mixed thoroughly into feed at the rate of 2 – 4 kg/tonne of feed (2 – 4 g/kg of feed).

For best results, use continuously.

Once opened, ensure the bag is tightly sealed between use to ensure longevity of the product, and store in a cool, dry area away from heat and damp conditions.
