

OPTOMEGA PLUS

Optomega Plus is a leading Omega-3 fatty acid supplement. Made from 100% natural high quality fish oil and specifically formulated to ensure consistent levels of EPA and DHA.

Ruminant

Omega-3 Fatty Acid Supplement for Ruminants Rich in EPA/DHA

Optomega Plus is a leading Omega-3 fatty acid supplement. Made from 100% natural high quality fish oil and specifically formulated to ensure consistent levels of EPA and DHA.

When looking for an Omega-3 source, it is essential to choose the right one. EPA and DHA are the two most biologically important Omega-3 fatty acids because they are readily available for the animal to utilise.

However, unless a critical level of EPA & DHA are supplied, the benefits of supplementing your animals will not be seen. Optomega Plus is especially formulated to ensure it provides a consistent and active level of EPA & DHA, which is why it is so effective!

Comes in the form of a dry, free-flowing powder, it is easy to handle and can be incorporate into feed or used as a top dressing. Additionally, we use unique foil-lined bags for our Optomega Range, so product consistency and shelf-life is guaranteed.

Key Benefits

- ✓ An excellent source of energy that is readily digestible.
- ✓ Especially formulated for Omega-3 enrichment in milk.
- ✓ Helps mitigate the negative impact of Omega 3:6 imbalance, which affects energy available for growth and overall performance.
- ✓ Enhances lactation performance and hence a better milk yield.
- ✓ EPA and DHA are known to aid fertility and reduce calving intervals.
- ✓ Enhance sperm quality and mobility.
- ✓ Helps to improve coat quality and sheen, ideal for showing animals.
- ✓ EPA and DHA supports the animal's natural defences, strengthening their immune systems.
- ✓ EPA and DHA are widely known for their anti-inflammatory properties which can help improve disease resistance and joint mobility.
- ✓ Sustainably sourced ingredients.

How to Use

Add into feed at rates given below, ensure thorough mixing or spread evenly as a top dressing.

Dairy Cow

120 – 160 g/head/day, 21 days pre-calving and first 100 days of lactation.

For best results, use continuously.

Once opened, ensure the bag is tightly sealed with excess air removed between use, to ensure longevity of the product. Store in a cool, dry area away from heat and damp conditions.
