OPTOMEGA POWDER

Optomega Powder is a leading Omega-3 fatty acid supplement. Made from 100% natural high quality fish oil, it is an excellent source of energy for your animals.

Pig

Omega-3 Fatty Acid Supplement for Pigs

Optomega Powder is a leading Omega-3 fatty acid supplement. Made from 100% natural high quality fish oil, it is an excellent source of energy for your pigs.

When looking for an Omega-3 source, it is essential to choose the right one. EPA and DHA are the two most biologically important Omega-3 fatty acids because they are readily available for the pig to utilise. However, unless a right level of EPA & DHA are supplied, the benefits of supplementing will not be seen.

Optomega Powder provides a sustainable source of Omega-3 for your pigs. It comes in the form of a dry, free-flowing powder, it is easy to handle and can be incorporate into feed or used as a top dressing. Additionally, we use unique foil-lined bags for our Optomega Range, so product consistency and shelf-life is guaranteed.

Key Benefits

- √ An excellent source of energy that is readily digestible.
- √ Helps mitigate the negative impact of Omega 3:6 imbalance, which affects energy available for growth and overall performance.
- √ Omega-3 fatty acids are known to aid fertility and enhance sperm quality and mobility.
- √ Enhances lactation performance of sows.
- √ Supports improved productivity.
- √ Omega-3 fatty acids supports the animal's natural defences, strengthening their immune systems.
- √ Omega-3 fatty acids are widely known for their anti-inflammatory properties.
- √ Sustainably sourced ingredients.

How to Use

Add into feed at rates given below, ensure thorough mixing or spread evenly as a top dressing.

Standard Application
20 kg/tonne of feed (20 g/kg of feed).

 For best results, use continuously.

Once opened, ensure the bag is tightly sealed with excess air removed between use, to ensure longevity of the product. Store in a cool, dry area away from heat and damp conditions.
