

ENVIREX

Envirex contains a unique combination of 2% w/w of the proven biocidal product Virex in a base powder formulation comprised of mineral desiccants and essential oils specifically designed to maintain a dry, healthy environment for all types of livestock animals.

Equine

Highly absorbent disinfectant powder for horses.

Contains a peroxygen based, powdered, broad-spectrum disinfectant Virex, which independent laboratory testing has shown to be effective against major viral, bacterial and fungal pathogens.

In independent laboratory testing, Envirex outperformed six major competitors in terms of absorbency.

The Base Powder formulation is comprised of ingredients which have various benefits which can help improve standard of living in your stables, yards and horse boxes.

Key Benefits

- ✓ Effective against major viral, bacterial and fungal pathogens.
- ✓ Can act as a dry disinfectant, as part of an overall biosecurity programme aimed at reducing and minimising bacteria levels in the environment.
- ✓ Trials shown to absorb more than 130% of its own weight, which is double that of many competitor products, and nearly 3 times more absorbent than lime.
- ✓ Envirex absorbs moisture and helps to keep the stable floor and environment dry, minimising the potential microbial bioburden in the horse's environment.
- ✓ Keeping floors drier will help reduce hoof problems. Furthermore, Envirex could have potential for use as a dry disinfectant footbath to improve hoof hygiene.
- ✓ Does not paste up to form clumps after drying.
- ✓ Reduce greasiness in horses accommodation, aiding in promoting a non-slip environment for horse and handler.

How to Use

For General use: Apply at 50g/m²

For best results, use continuously throughout the year.

Nature's Answer

--	--

Once opened, ensure the bag is tightly sealed between use to ensure longevity of the product, and store in a cool, dry area away from heat and damp conditions.
